

WindPro LED

The innovative WindPro LED has a modern design and is a real eyecatcher! The mode of the WindPro LED can be switched from “energy-saving” in the night to “bright” during the day. A powerful LiFePO4 battery is hidden and locked in the base. A digital display indicates the status of the battery. The decorative cover-frame with black passepartout is made of polycarbonate. Moreover, the WindPro LED is lockable and the poster is fixed with clamps.

Patent No: OHIM DM/084 128
